

I.T. AS IT SHOULD BE

At Astoundry, we provide exactly what our tagline states: IT as it should be. And for us, that means delivering the same high level of IT, web and database development you expect from your in-house staff or expensive consulting firms - without the levels of commitment, complications and expense such solutions require. Just a simple, cost-effective, turnkey solution you can call upon at will.

Our services combine top-tier, US-based project managers with accomplished developers worldwide to produce world-class solutions at an astounding price.

We invite you to review the rest of our brochure, visit our web site or give us a call. We think you'll find our approach refreshing, effective, and perhaps just a little more sensible. Or, as we like to say, IT as it should be.

Our services combine top-tier, US-based project managers with accomplished developers worldwide to produce world-class solutions at an astounding price.

About Our Services

Backed by a virtual army of programmers, Astoundry has experience with a wide range of IT, web- and database development projects, including the integration of legacy systems, the creation of new software applications, or the launch of a new eCommerce function. Our full range of expertise includes:

- Legacy Application Transition to Newer Platforms
- Legacy Application Management and Maintenance
- Building new software applications
- Catalog Building-Carefully constructing databases to hold large amounts of data.
- Wireless Enablement- Astoundry can extend a client's existing applications to the any form of wireless web as well as new platforms.
- B2B Applications and Exchanges -Develop solutions that seamlessly integrate the backend transactional systems with the B2B procurement applications.
- Portals-Astoundry can help clients launch their portals on time and assist them in enhancing its features and functionality using its expertise in content management tools and technologies.
- ASP Solutions - Convert software products from a client/server model to an ASP model.
- e-Business Integration-Astoundry can help clients leverage their existing data and systems to build seamless e-business systems.
- Data Warehousing-Building, architecting, integrating, consolidating, and managing large data warehouses.
- A research facility to help U.S. companies explore new technologies or experiment with existing technologies.

About Our Teams

Led by our experienced, client-focused and U.S.-based project managers, Astoundry's teams of international programmers provide the level of expertise required to ensure you'll receive a world class solution at a fraction of the costs you're likely paying elsewhere.

Drawn largely from the staffs of premier universities worldwide, Astoundry's programmers are both fully-accredited and highly-skilled in the latest tools, trends and technologies the world has to offer.

About Our Methods

Based on the same processes used by NASA to develop the systems that guide flights in space, Astoundry's

project management methodology is named LAUNCH. Representing the end-to-end life cycle of development, LAUNCH stands for each phase involved in a project's completion; Learning, Analysis, UNdertaking, Coding and Handing-off. Each step is defined in detail in Astoundry's Published Software Development Methodology.

Best of all, LAUNCH is managed by Astoundry's own, U.S.-based project managers. Our PMs are dedicated to accurate requirements gathering, managing the development team, scope, client schedules and budget and communications with the client. Making them personally responsible - and personally committed - to your project's success.

About Our Commitment

At Astoundry we realize that outsourcing a project can sometimes require a leap of faith. Which is exactly why we are so fanatical about ensuring our clients are always informed, involved - and completely in charge.

In fact, we take service so seriously that our Chief Executive Officer also functions as our Chief Service Officer. A title he considers to be ultimately more important. So much so that he invites - no, he insists - that you contact him personally - via phone, FAX or email - in the event you are dissatisfied with any aspect of your project. And he will make it right. After all, he's the boss.

About Us

That our staff seems amazingly familiar with your problems should come as no surprise. The fact is, almost every one of your key contacts at Astoundry - from our founders to our senior executives to our project managers - has extensive experience working in large, fast-moving corporate and technology start-up IT departments. Meaning we can sympathize with your dilemmas, as well as empathize.

Of course, most important of all, we can also provide you with a great solution. One that will help blow away your competition - without blowing out your budget. A world-class solution, at an astounding price.

We would love to submit a proposal for your next IT project. We think you'll like what you hear almost as much as the final project we deliver. Contact Information & Locations
